The Town will select the bid that it deems to be in the Town's best interest and issue a Notice of Conditional Award of Bid to the successful bidder. END OF INSTRUCTIONS TO BIDDERS

TECHNICAL SPECIFICATION NO. 1

PLOWING & SANDING

DESCRIPTION

This item shall consist of furnishing the truck & sander unit with a plow & driver and/or a loader of motor grader with plow & driver and /or a loader or motor grader with plow & driver, fuel, oil, lubricants, tire chains, load cover tarps, shovels, hand tools, maintenance, and other such other incidental items to enable the Contractor to plow and sand public roadways for the passage of traffic. The conditions under which the Contractor shall operate are considered Emergency Conditions due to the hazard of ice and snow accumulating on the roadway.

While the number of hours of plowing and sanding that will be required of the Contractor is unknown in advance for any winter season, it is anticipated that approximately 100 hours of service may be required during the Contract Year. The Contractor should understand that this is at best a guess based upon past experience.

The following is the record of hours expended for the last five fiscal years:

Fiscal Year	Hours
2016-2017	127
2017-2018	107
2018-2019	73
2019-2020	54
2020-2021	66
Five Year Total	427
Average of Five Years	85.4

MATERIALS

The Contractor shall furnish all the required materials as may be necessary to accomplish the Work with the exception of the following:

1. The Town shall supply at the Highway Department Yard on 50 River Road sand, salt, or sand-salt mixture as may be designated by the Director of Public Works. Loading of the Contractor's truck shall be by Town equipment. The Contractor's driver shall be qualified by examination by the Director of Public Works to operate such Town equipment as may be necessary in the event that Town personnel are not available to operate the Town equipment to load the Contractor's truck.
2. The Director of Public Works shall provide a location outside of the Highway Garage where the Contractor may park his equipment during the storm and have access to a 120 volt outside outlet for energizing a block heater.

AVAILABILITY OF EQUIPMENT AND PERSONNEL

The Contractor shall have available equipment and personnel for the exclusive use of the Town as may be necessary to fulfill his Contract obligations during the period from 15 October to 30 April (Winter Season) in any Contract Year. At other times of the year, equipment and personnel shall be made available to the Town on an as needed basis as may be mutually agreeable to both parties to fulfill the minimum Contract commitment.

METHODS

The Contractor shall operate plowing and sanding equipment in a safe manner consistent with the roadway and weather conditions prevailing at the time of the work. It should be expressly understood that roadway and weather conditions may make the Contractor's operations hazardous and they are outside of the owner's power to control. Depending upon the rate of accumulation and type of freezing precipitation, the Contractor may only clear a single lane width on a given circuit of the established plow and sanding route. As the storm diminishes in severity additional circuits of the plow route will enable the Contractor to push back to the edge of the roadway and fully open the traveled way.

Application of de-icing chemical, treated salt or traction sand shall be metered to enable optimum coverage of the plowed lane based upon prevailing and anticipated roadway surface conditions. Hills, approaches to stop signs & traffic lights, curves, and bridge decks will require an additional level of attention compared to a flat straight roadway.

Due to the severity of some roadway gradients and the possibility of ice formation, the only practical application may be to back the plow truck up the gradient while applying de-icing chemical or traction sand. This process is potentially very hazardous and requires considerable skill with the equipment, good judgment, and steady nerves.

The Contractor's operator should at all times realize that he is sharing the roadway with other motorists with different levels of skill in operating their vehicles under winter conditions. This may present a greater hazard than the weather or roadway conditions.

RESPONSE TIME

The Contractor shall commence operations with a fully equipped truck, plow, and sander combination at the Highway Department Yard no later than sixty (60) minutes after being called out by the Director of Public Works or the Canton Police Department. This shall be evidenced by a request time by the Canton Police Department and a time clock punch-in at the Highway Department Garage.

Failure to meet the sixty (60) minute call-out time period may result in liquidated damages being assessed against the Contractor for each fifteen (15) minute period beyond the sixty (60) minute call-out period.

EQUIPMENT
